CIVIL AVIATION AUTHORITY OF MALAYSIA
ADVISORY INFORMATION 15/2026

24th November 2026

PUBLIC CONSULTATION REPORT ON THE PROPOSED MALAYSIA LOW ALTITUDE ECONOMY FRAMEWORK

1 Introduction

1.1 This Advisory Information is issued to inform the public that the Civil Aviation Authority of Malaysia (CAAM) has published the Public Consultation Report on the proposed Malaysia Low Altitude Economy (LAE) Framework.

1.2 The Report summarises the feedback received, presents CAAM's assessment of the issues raised and sets out the proposed way forward in finalising the Framework.

2 Background to the Public Consultation

2.1 As announced in Advisory Information 10/2026, CAAM conducted the public consultation from 3 August to 2 September 2026 to obtain views and recommendations on the proposed Framework.

2.2 CAAM received submissions from 54 stakeholders, including government agencies, industry participants, industry associations, civil society organisations, academia and other interested stakeholders.

2.3 The proposed Framework sets out a coordinated approach to the safe, secure and sustainable development of Malaysia's LAE. It comprises four Strategic Pillars: Safe Aircraft, Safe Operations, Connected Infrastructure and Thriving Industry.

3 Consultation Outcomes and Next Steps

3.1 The consultation showed broad support for the proposed strategic direction, the four Strategic Pillars, the risk-based regulatory approach and the phased implementation roadmap. Respondents also recommended clearer regulatory requirements, stronger aviation safety measures and closer coordination among agencies, alongside improvements in infrastructure and industry participation.

3.2 CAAM intends to retain the overall structure and strategic direction of the proposed Framework. In finalising it, CAAM will consider refinements to risk-based regulatory requirements, aircraft registration and identification, low-altitude airspace management, regulatory capability and implementation readiness.

3.3 The feedback will also inform the subsequent development of regulatory measures, implementation programmes and supporting initiatives. CAAM will pursue these progressively, considering aviation safety, regulatory readiness, technological developments and national priorities.

4 Other Information

4.1 The Public Consultation Report is available on CAAM's official website at www.caam.gov.my

4.2 All enquiries regarding the report shall be made to the Strategy & Transformation Division, Civil Aviation Authority of Malaysia, Putrajaya via email at lae.policy@caam.gov.my
