## CNS-ATM INSPECTOR

### Job Description

Responsible for carrying out State regulatory oversight of **Communication, Navigation, and Surveillance (CNS)** systems that support air navigation services, ensuring compliance with **ICAO Annex 10 — Aeronautical Telecommunications**, relevant ICAO SARPs, and **CAAM Civil Aviation Directives**. The role includes conducting technical inspections, verifying change acceptance, and monitoring system performance to ensure that CNS infrastructure supporting **Air Traffic Management (ATM)** operations remains safe, reliable, and compliant with State regulatory requirements, while maintaining regulatory independence from service providers.

### Job Information

- **Department:** Air Navigation Services & Aerodrome Standards
- **Job Position:** Executive / Senior Executive
- **Type of Employment:** Permanent
- **Location:** Putrajaya (Malaysia)

### Qualifications for Application

Candidates must possess the following criteria:

#### **a) Citizenship**

- Malaysian citizen.

#### **b) Academic & Professional Qualifications**

- A Bachelor's Degree in a relevant field or any related field from a higher education institution recognized by the Government, or an equivalent qualification.
- Completed of training in **CNS/ATM systems, aeronautical telecommunications**, or **aviation regulatory oversight** will be considered an added advantage.

#### **c) Additional Requirements**

- Minimum of three (3) years of experience in CNS/ATM operations.
- Strong stakeholder management skills, with the ability to engage and coordinate effectively with relevant parties.

- **Technical:** Knowledge of ICAO Annex 10 standards, CNS infrastructure, air navigation system architecture and operational requirements, radar and surveillance systems (including SSR, ADS-B, and MLAT), communication networks supporting Air Traffic Services (ATS), as well as navigation aids and satellite-based navigation systems.
- **Regulatory:** Audit/ surveillance methods, evidence management, finding writing, Corrective Action Plan (CAP) verification, independence and ethics, confidentiality and data protection.
- **Analytical:** Conducting technical performance evaluations, analyzing system failures and reliability, interpreting monitoring data, and communicating risks with clear operational implications.
- **Communication:** Provide precise reports and briefings in Bahasa Malaysia and English, while offering professional challenge without affecting operations.
