## **EXECUTIVE, TECHNOLOGY & INNOVATION**

### **Job Description**

Responsible for supporting the implementation and administration of aviation security technology programmes by assisting in the development of technical requirements, conducting research and assessments on emerging technologies, reviewing aviation security system documentation, maintaining records of approvals and trials, and providing technical support to stakeholders. The role contributes to ensuring that aviation security technologies and infrastructure comply with national regulations, ICAO Standards and Recommended Practices (SARPs) and operational requirements.

### **Job Information**

- **Department:** Aviation Security (Regulatory)
- **Job Position:** Executive
- **Type of Employment:** Permanent

### **Qualifications for Appointment**

Candidates must possess the following criteria:

#### **a) Citizenship**

- Malaysian citizen.

#### **b) Academic and Professional Qualifications**

- A Bachelor's degree in Engineering, Information Technology, Aviation Security, Security Management, Aviation Management, or a related field from a higher education institution recognized by the Government. A Master's degree is an advantage.
- Minimum of three (3) years of relevant experience in aviation security, security technology, regulatory compliance, airport operations, or related fields.

#### **c) Skills and Competencies**

- Experience and knowledge in aviation security management and security technology programmes.
- Strong strategic thinking skills, with the ability to manage regulatory compliance, analyse information and data, and recommend practical solutions.

- Effective people management, communication, and stakeholder engagement skills.
- Strong interpersonal skills with the ability to build and maintain productive working relationships.
- Excellent verbal and written communication skills, with the ability to engage and manage stakeholders effectively.
- Proven ability to apply professional knowledge and industry experience to solve complex technical and operational challenges.
- Strong critical, analytical and strategic thinking abilities.
- Good understanding of aviation security management systems, operations and applicable regulatory requirements.
